ACTA MATHEMATICA SINICA, Vol. 13,

CONTENTS

No. 1

On an interpolation problem of entire functions .... *Wang Zhèn-yǔ* (1)

On discrete valuations .... *Tai Zhi-zhong* (17)

A gradient method for finding the eigenvalues and the eigenvectors of a selfadjoint operator .... *Wang Jìn-rú* (23)

On the convergence in Banach spaces .... *Xìe Tíng-fan* (29)

A boundary problem of hyperbolic systems and its applications .... *Gǔ Chao-hǎo* (32)

The elliptic geometry of extended spaces .... *Lù Qǐ-keng* (49)

Qualitative study of a class of boundary-value problems for integro-differential equations and approximate determination of their solutions .... *D. Mangeron, L. E. Krivocheins* (63)

Algebraic treatment of the notion of satisfiability in the system $\mathfrak{S}_\varepsilon$ .... *Gao Héng-shan* (68)

The non-reducibility of the operation $\mathfrak{B}_p\mathscr{P}^{a+i}_p\cdots\mathscr{P}^{a+1}_p\mathscr{P}^{a}_p$ .... *Wú Zhèn-dé* (78)

On distribution of integral functionals of homogenous denumerable Markov process .... *Wú Lì-dé* (86)

Boundary value problems for the degenerate elliptic partial differential equations .... *Dǒng Guang-chang* (94)

On the regular theorem of real semi-simple Lie algebra .... *Chén Zhòng-hù* (116)

Bayes sequential procedures with *K*-decision action for exponential Pólya IV class .... *Chéng Píng* (119)

Contributions to the theory of conjugate nets in projetive hyperspace (V) .... *Su Bù-qing* (136)

No. 2

On Bieberbach polynomials .... *Wú Xúe-móu* (145)

Fourier analysis on unitary group (III) convergence criteria .... *Gong Shang* (152)

The best approximation of periodic differentiable functions by trigonometric polynomials .... *Xiè Tíng-fan* (162)

On the closure of $\{z^{\tau_n}\log^j z\}$ in a domain of complex plane .... *Shěn Xìe-chong* (170)

Theory of distributions of *S* type and pansions .... *Zhang Gong-zhìng* (193)

Continuity and total continuity of Urysohn operator .... *Zhang Shàng-tài* (204)

The resonance theorem for non-complete space .... *Dìng Guang-guì* (216)

Researches on a pair of plane curves with a representable singular point of order (m,n) .... *Fon Té-chi* (223)

On the classification of mappings of K^{n+r} into S^n .... *Zhang Sù-chéng* (231)

The lattice-points in an ellipse .... *Wu Fang* (238)

The converse of a theorem of Ladyzhensky for the complete continuity of the Urysohn operator .... *Wáng Sheng-wàng* (254)

A note on the large sieve method and its applications .... *Pan Chéng-dòng* (262)

The prediction theory of multivariate stationary processes (I) .... *Jang Zé-péi* (269)

The lattice-points in a circle .... *Chen Jǐng-run* (299)

A note about "The elliptic geometry of extended spaces" .... *Lu Qǐ-keng* (314)

No. 3

The index of solutions of nonlinear equation in Banach space ······························· *Chén Wén-yuán* (315)

Fourier analysis on unitary group IV. On peter-wayl theorem ··········· *Gong Sheng* (323)

A boundary value problem for the degenerate elliptic equation ······························· *Chén Liáng-jing* (332)

The periodic Riemann boundary problem and its applications to theory of elasticity ······························· *Lu Chian-ke* (343)

On starlike typically-real functions ······························· *Lài Wàn-cǎi* (389)

On the closure of $\{z^{r_n}\log^j z\}$ in the domain of the complex plane ······························· *Shěn Xìe-chang* (405)

On the groups of analytic homeomorphism of the bounded positive (m,p)—circular domains in two complex variables space······························· *Xǚ Yǐ-chao* (419)

On the imbedding theorems of a class of functional spaces ··········· *Dǎng Song-shi* (433)

On the constructive property of a class of almost-periodic functions ······························· *Chéng Něi-dòng* (441)

Compactness and quasiconformal mappings ······························· *He Cheng-gí* (447)

On the existence of homeomorphic solutions of a system of quasi-linear partial differential equations of elliptic types······························· *Li Chung* (454)

The natural systems and the homotopy types of A_n^2-polyhedra ········ *Shěn Xín-yào* (462)

On Borel's lines of the entire functions defined by Laplace-Stieltjes transforms ······························· *Yú Jia-róng* (471)

No. 4

Note on mathematical logic ······························· *Mo Shao-kui* (485)

On the integral curvature of curve (II)······························· *Ding Chung-hua* (508)

On the existence and uniqueness of the generalized solutions of the Cauchy problem for quasilinear equations of first order without convexity conditions ······························· *Wu Zhuo-qun* (515)

Generalized analytic functions of B, H_δ, D, A class and the convergence of sequences of such functions ······························· *Wang Hong-sheng* (531)

A statment on my paper "Steenrod operation and homotopy groups (II)" ······························· *Zhou Xüe-guang* (544)

Function of bounded variation on sequence space ······························· *Wú Cuéng-xen* (548)

On the absolute stability of systems with time-lags······························· *Li Xùn-jing* (558)

Absolute continuous functions with values in a Banach space ··········· *Mǎ Shào-qin* (574)

Theorems of differential inequality for a non-linear Bianchi equations ······························· *Wú Zhueng-haǐ* (584)

Periodic solutions and limit cycles of a differential equation which contains a parameter······························· *Chen Xiang-yán* (607)

A revision to "Boundary value problems for the degenerate elliptic partial differential equations" ······························· *Dǒng Guang-chang* (620)

On a two-phase Stefan problem (1)······························· *Jiang Lǐ-shàng* (631)

On the functions represented by Redemacher series ······························· *Wang Si-lié* (647)

Correction to "The prediction theory of multivariate stationary processes (I)" ······························· *Jong Zé-pèi* (653)
